

# Police Activity at Round Rock East Shopping Center, December 2009-April 2010

## NOTES

This photo shows the three buildings and parking lot included in the analysis. The data source for this analysis is the Police Department's Computer-Aided Dispatch (CAD) database. That means the data are drawn from the information police dispatchers enter into the computer as calls occur. The primary limitation of these data is that they may not reflect the actual nature of a call or its true final disposition. Thus, some care should be exercised in interpreting the results presented here. Traffic stops and animal-related calls are excluded from this analysis. Any questions regarding the results of this analysis, the data source, or the preparation of this report should be directed to:
